# The Process

Planning a wedding can feel overwhelming, but with my first-hand experience, I understand the challenges that come with it. From the very start, I provide clear communication and ongoing support to ensure you feel as comfortable as possible. While other parts of your wedding may have their ups and downs, your stationery will be a true highlight.

## 01

### Initial Consultation

I believe that every project should be unique and tailored to your specific needs. That's why I offer a personal consultation to discuss your ideas, themes and preferences. This consultation will allow us to gain a better understanding of your vision for me to take away to create a moodboard before we dive into designing.

## 02

### Design

Once we've refined your vision, received your deposit, and signed the contract, I'll begin designing your stationery suite. This starts with hand-painting and illustrating the unique elements that will make your stationery truly special, creating a magical first impression of your day. I'll keep you involved throughout the process, ensuring you're happy with the direction and building excitement for you both.

## 03

### Approval and Print

Once your designs are complete I will send a digital proof for sign off and print approval. Sign off and final payments will need to be finalised before items are sent to print. I will prepare all items to be sent to the printers and any embellishments will be acquired in preparation for assembly.

## 04

### Assembly and Delivery

This is the exciting part when your wedding suite designs become a physical product. I will check all prints are correct to artwork and will assemble the wedding stationery suites as needed. These will then be carefully packed and dispatched to you. And then the best bit is you receiving your invitations.
